-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is in response to the filing of the application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Katsuhiko et al. (JP 2002025404).

Katsuhiko et al. discloses a fuse element (Fig. 1) that contains a wire element (fuse) (10) has an alloy composition in which 0.1 or more weight parts of silver (Ag) are added to 1% or more weight parts of alloy of Indium (In) and Tin (Sn) and a heating element (2) for fusing off fuse element. Katsuhiko discloses all the claimed limitations except for the alloy composition of metals of 0.1- to 7 weight parts and 100 weight parts of an alloy of 52% to 85% In and Sn. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have weight parts of In and Sn of 52 to 85%, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233 (1955).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kawanishi (U.S. Patent 5,982,268) discloses a fuse with an alloy composition of Indium (In) and Tin (Sn) with other metals added to the alloy composition.
